

JPanel

ActionListener

org.panels.MainMenu

```
classDiagram
    class JPanel
    class ActionListener
    class MainMenu["org.panels.MainMenu"]
    MainMenu --> JPanel
    MainMenu --> ActionListener
```

The diagram illustrates a class hierarchy where the class `org.panels.MainMenu` is the superclass for both `JPanel` and `ActionListener`. This is represented by a horizontal line connecting the two subclasses, with vertical lines extending from the center of this line to each subclass box, and arrows pointing upwards towards the subclasses.
